

Ship Management & Ship Building Services

MARINE SERVICES

Marine operating services include:

- Vessel Crewing
- Vessel Chartering
- Maintenance Engineering
- Safety System Management
- Quality System Management
- Integrated Logistics Support
- Property Management and Inventory Control

PROJECT MANAGEMENT

OSI will develop marine projects for the design or conversion of vessels. Our project management skills include planning, engineering, procurement and construction. We manage subcontractors for compliance with project objectives, safety, and quality.

SHIP BUILDING

OSI can provide ship construction project management from Front End Engineering and Design through completion. Capabilities include:

- Design Review
- Construction Planning
- Construction Supervision
- Schedule and Cost Management
- Warranty Performance Management

SHIP MANAGEMENT

Ship management includes best practices for crew safety and environmental protection. Increasing regulations require compliance with many international standards:

- Classification Society Rules
- Flag State Registry (USCG)
- OCIMF, IMO, SOLAS
- Shipboard Security (MTSA/ISPS)
- Safety System Management (ISM)
- Quality System Management (ISO)

LEASING / CHARTERING

OSI will provide ship chartering or leasing services meeting customer shipping requirements. Through a worldwide network of brokers and owners, OSI will locate ships of the highest quality at market prices. Bareboat chartered ships can be fully operated by OSI on a turnkey basis.

REPAIR / MAINTENANCE

OSI Engineers are highly qualified and experienced technically to plan and administer ship maintenance plans. Preventative and planned maintenance will be scheduled and monitored through systems and procedures. Major vessel overhauls and scheduled regulatory drydockings will be planned well in advance. This enables control of cost and schedule factors in the shipyard. OSI Engineers have performed maintenance on ships world wide, and drydocking in shipyards in many countries. Compliance requirements cover:

- American Bureau of Shipping
- U.S. Coast Guard
- Condition Assessment Schemes
- OSHA

Ocean Shipholdings, Inc. boasts of extensive experience in delivering quality ship management and ship building services. Vessel maintenance is among the company's expertise. It has performed vessel repair services in different locations worldwide. It also provides preventive routine checkups and carefully planned vessel overhauls to keep costs at minimum. OSI's ship management services cover all aspects of marine operations, including vessel crewing, safety and quality management, logistics support and inventory control. As for its ship building services, the company can handle everything from the planning stage - including the ship design review, scheduling and costing - down to the supervision of the actual construction. The vessel maintenance services by OSI are performed in compliance with the requirements of the American Bureau of Shipping, US Coast Guard, Condition Assessment Schemes, and OSHA. The company also employs its own set of methods and procedures to ensure that every vessel repair and related services it delivers would leave clients satisfied.
